THE COMPANY

Sabelt, founded in 1972 by Piero and Giorgio Marsiaj, specializes in the development and production of car seats for performance road cars, racing products for motor racing and seatbelts for aerospace. The quality of Sabelt products is the result of intense research and development, which allows it to reach the highest levels of performance and safety. Sabelt invests 8% of its resources annually in research and development and is the only company in its sector to have an internal dynamic test laboratory to perform ECE and FIA tests, aimed at verifying the strength and effectiveness of its products.

SINCE 1972

We have provided the top historical car manufacturers with innovative restraint systems for decades.

SAFETY

For Sabelt, safety is of the utmost importance: first in the car, supplying the best seat belts in the world, second for drivers all over categories and championships.

DESIGN

Sabelt offers high performance levels integrated with style and design. Each component is designed and engineered either exclusively by Sabelt in support with external Design&Style centres or in partnership with the client.

INNOVATION

We transform ideas into products. We collaborate with our customers to study new and better solutions and meet specific needs and new requirements. All our products are the result of a process that brings together various novel ideas with engineering and technology.

SUSTAINABILITY

Sabelt works every day to integrate environmental, social and economic sustainability into its business model. The Company focuses on reducing environmental impact and improving working conditions to promote responsible and sustainable growth.

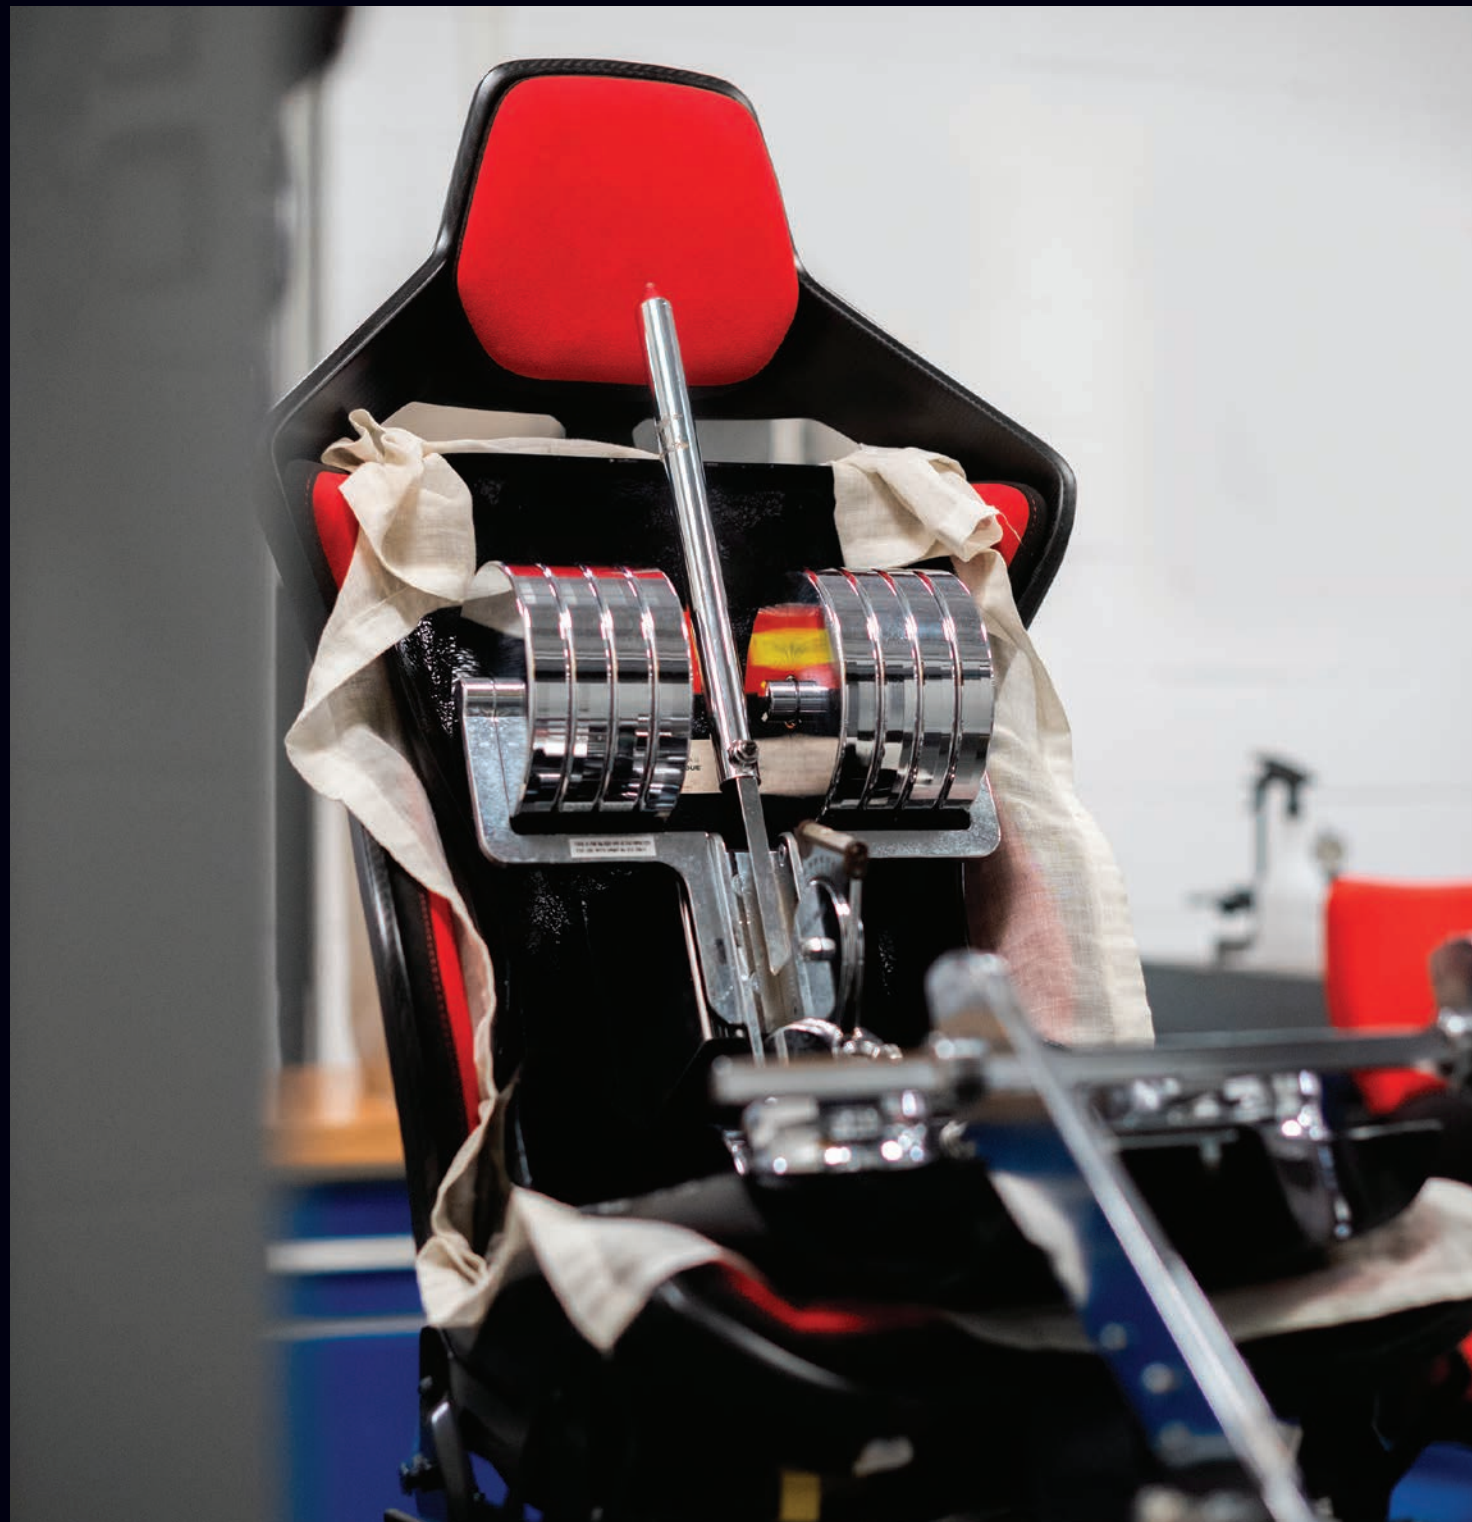

Our commitment:

- Clean energy from solar panels on the road to carbon neutrality
- Ethical governance with the 231 Model and Ethical Code
- Corporate welfare system and involvement of local community
- Reduce impact of finished products with recyclable and lightweight materials

Download our latest sustainability report to learn more

SAFETY AND LABORATORY

The pursuit of safety has played a key role since the foundation of Sabelt. We have been the first to equip the laboratories of our plant with a dynamic test which simulates crashes and pre-homologates products for the strict automotive standards: an innovative system prescribed by ECE and FIA regulations. All tests are conducted with the specific intent to maintain a bigger margin to the minimum required, with outstanding performance levels built with style and design.

PRODUCTION

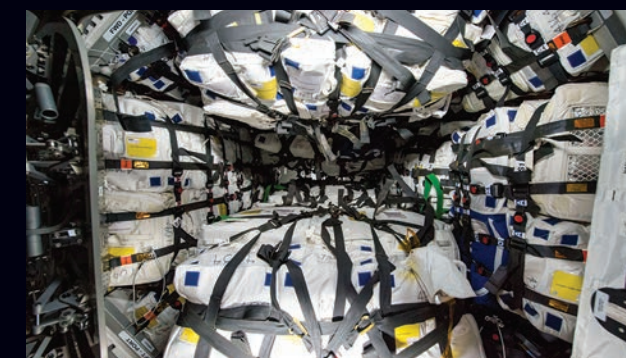

All Sabelt products are designed and engineered exclusively by Sabelt in the operational headquarters in Turin, in collaboration with external design centers or in partnership with clients car makers.

AUTOMOTIVE SEATING

From the world of motorsport, Sabelt has developed a range of premium sports seats for the world's top car manufacturers. It designs and manufactures safety belts and seats for vehicles with a strong sporting connotation, dedicated to an advanced and demanding driver, that is sports oriented and has a particular attention to quality. Its main partners are: Ferrari, McLaren, Alpine, Abarth, Alfa Romeo, Jaguar, Cupra, Maserati and Aston Martin.

AEROSPACE AND DEFENSE

Sabelt is able to develop and implement new technologies dedicated to various applications of safety seatbelts in niche markets, such as the military, aviation, aerospace, exceptional transport and many other fields where technical and customized products are required. Since 2010, Sabelt has been the supplier of Thales Alenia Space Italia for the restraint systems of the Cygnus Orbital-ATK module (belts and nets).

BEYOND NEW FRONTIERS

Sabelt and the Dacia Sandriders join forces to improve safety in the world of rallying

The desert as a backdrop, sand and dirt as the stage for Sabelt's latest challenge: **innovating safety** in Rally Raid.

A challenge posed by the FIA and its Health and Safety Department who, through studies over the years, have found that **spinal injuries caused by a hard impact or landing are a common problem** reported by cross country rally drivers.

Rally cars are designed and built to compete in difficult environments and on the roughest of terrains, which presents unique challenges. Encounters with unexpected obstacles can result in large jumps and hard landings which the car, driver and co-driver must be able to handle safely. Accident analysis conducted by the FIA has shown that **the load on the spine, particularly during hard landings, can reach critical levels and pose a risk of injury.**

With this in mind, **Sabelt has teamed up with the Dacia Sandriders**, which will compete with the **Sandrider** prototype in the Dakar and the World Rally Raid Championship in 2025 on some of the world's most demanding outdoor test tracks.

Inspired by the Manifesto concept car, Dacia's ideas laboratory unveiled in 2022, Sandrider is a completely new vehicle designed specifically for rally-raid. This innovatively designed prototype focuses on agility and lightness, responding precisely to the essential needs of the driver and co-driver.

Sandrider was created to meet this challenge with an approach faithful to Dacia's 'robust & outdoor' concept, taken to the extreme.

And this is where Sabelt, with its decades of experience in motorsport safety, comes in as the ideal partner to raise the level of driver safety. Together with the Dacia Sandriders, **Sabelt designed a seat with high safety standards**, upholstered with special anti-bacterial moisture-regulating fabrics, **mounted on an innovative shock absorber from Prodrive**, a British technology company and motorsport team.

Overall, system **is able to cushion around 60 per cent of the impact** and provide greater safety for the pilots on board by bringing the peak load below the threshold value at which spinal injuries occur.

It is Sabelt's nature to push the boundaries of innovation, creating a safer future for riders and setting a new standard for protection in the most extreme racing environments.

#Sabeltmeans #safety

FIXING BRACKETS

F1

Steel brackets, th. 3mm, in compliance with FIA.
Z200087_A

F2

Aluminium brackets, th. 5 mm, in compliance with FIA.
Z200005_C

F3

Sliding tracks, travel 230 mm. No FIA.
Z200002_A

F4

Steel brackets for GT-635. Fia Homologated 8862-2009. Bolts included.
Note: Specify the seat size during the order.
RCST635FIX _KIT

F5

Sliding tracks for GT-635. Fia Homologated 8862-2009. Bolts included.
Size M: **RCST635SLIDINGM _KIT**
Size L/XL: **RCST635SLIDINGXL _KIT**

F8

Brackets for GT-PRO M. Fia Homologated 8862-2009. Bolts included.
RFST0028 _KIT

F11

Brackets for GT-PRO XL. Fia Homologated 8862-2009. Bolts included.
RFST0032 _KIT - RFST0033 _KIT
RFST0036 _KIT - RFST0038 _KIT
RFST0047 _KIT

F12

Steel bracket for 8855-2021 homologated seats. Bolts included.
RFST0071 _KIT

F 12 bis

Steel bracket for 8855-2021 homologated seats. Bolts included.
RFST0051 _KIT

F 12 ter

Steel bracket for 8855-2021 homologated seats. Bolts included.
RFST0095 _KIT

F13

Steel brackets for GT-X GT3. Fia Homologated 8862-2009. Bolts included.
RFST0049 _KIT - RFST0091 _KIT
RFST0093 _KIT

F15

Sliding tracks for GT-X CHP. Fia Homologated 8862-2009. Bolts included.
Size M: **RFST0077 _KIT**
Size L/XL: **RFST0078 _KIT**

F16

Steel brackets for GT-X CHP. Fia Homologated 8862-2009. Bolts included.
RFST0083 _KIT

F17

Steel brackets for GT-MCL. Fia Homologated 8862-2009. Bolts included.
RFST0067LH _KIT - RTST0067RH _KIT

F17 bis

Steel brackets for GT-MCL. Fia Homologated 8862-2009. Bolts included.
RFST0068 _KIT

F17 ter

Steel Brackets for GT-MCL. Fia Homologated 8862-2009
RFST0069

F18

Steel Brackets for GT-AM specific for F458. NOT HOMOLOGATED
RFST0041

F19

Steel Brackets specific for GT-PROXL for porsche 991GT3 - 992GT3R.
RFST0082

UNIVERSAL BRACKET

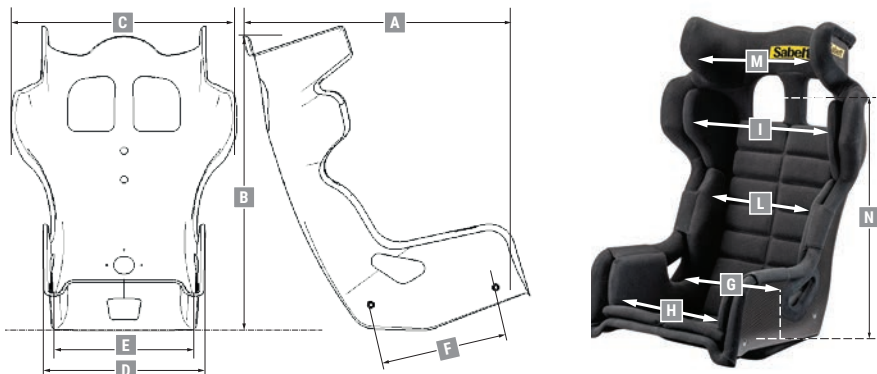

Compatible with all seats

F14

Universal seat subframe to be adapted to the vehicle body floor according to FIA 253-65B Annex J instructions.
- 2x 35 mm squared section pipes
- 4x end plates (90x45) mm
- 4x steel plates (110x65) mm
- 4x M8 bushing
RFST0079
